

The Genesis Series 7 loudspeakers are styled with simple, unfussy lines, and utilize natural materials that convey a sense of warmth. They are simple yet sophisticated and designed to fit in all interior design styles without standing out like a sore thumb.

We want the system to be enjoyed by the whole family. Hence, they are designed to encompass a family sitting on a sofa, and yet play with Absolute Fidelity® so that all members of the family can enjoy the music that they love – from rock, to classical, to electro-house to jazz.

They also allow “audiophile” placement – to focus on one seat: just toe them in. But when placed for the family, they have a large *sweetheart* spot.

For additional family friendliness and to protect the health of our young and the vulnerable, we make them out of low-VOC bamboo-ply, finish and glue.

Bamboo is the greenest of manufacturing material available. It is the world’s fastest growing plant and unlike hardwood trees that can take decades to mature, is ready to harvest in 4 years. Thanks to fast re-growth, it is also the best material to sequester CO₂. It releases 35% more oxygen to the air and captures more CO₂ than a similarly sized stand of hardwood trees. It can be cultivated in places where other crops require supplemental water and fertilizers to grow.

Every pair is lovingly custom-built by craftsmen in Washington State in the USA. As befitting the Evergreen State, the standard finish is in natural bamboo. However, as with all our loudspeakers, they can be in “any” custom finish to match your personal aesthetic.

At the entry-level of Genesis, we incorporate trickle-down technologies from the flagship Genesis Prime+. The “best tweeter in the world” – the Genesis Ring-Radiator Ribbon Tweeter (GR3T) and the same crossover components are used throughout the product line up to the flagship Prime+.

The original composite sandwich with carbon-fiber layers developed for the reference line dissipates

Samba (front) and Minuet (rear)

absolute fidelity®

vibrations and is incredibly inert, but is too expensive to incorporate in the G7-series. We make innovative use of bamboo-ply in much the same way as carbon fiber is used, which results in a low-mass high-Q composite that manages resonance without resorting to massive cabinets and excessive damping which may suck the *life* out of the music.

Ultra-light titanium mid/woofers allow it to play with the clarity, detail and resolution that all Genesis loudspeakers with the ribbon midrange are famous for. Our sealed box acoustic suspension results in the deep, tight, tuneful bass that Genesis is renowned for. We made a conscious decision to design for quality of bass and not quantity of bass.

With the G7 Foxtrot, we incorporated two isobaric-loaded 8-inch woofers to achieve the articulate bass we are known for, and yet maintain a loudspeaker that is easy to drive. With the G7 Samba, we incorporated the Genesis servo-controlled bass using a single 8-inch woofer to give us more depth and clarity at the lowest notes of double basses and electronic dance tracks.

Genesis loudspeakers are designed and built for the family, for all music, and the future.

Tango

G7 Minuet

Musical Range	E1 (41.2Hz) to Max
Sensitivity	85 dB 1 watt 1 meter
Input Impedance	4 ohms (nominal)
Tweeters	Two Genesis R3T (front & rear)
Mid-Woofer	One 5.5" Genesis titanium cone
Tweeter Controls	Soft/Bright (\pm 4.5 dB)
Dimensions	H 42 " x W 12 " x D 14.5 " H 1070mm x W 305mm x D 370mm
Weight	60 lbs (27 kg)
Finish Options	Natural Bamboo

G7 Tango

Musical Range	D1 (36.7Hz) to Max
Sensitivity	86 dB 1 watt 1 meter
Input Impedance	4 ohms (nominal)
Tweeters	Two Genesis R3T (front & rear)
Mid-Woofers	Two Genesis 5.5" titanium cone
Tweeter Controls	Soft/Bright (\pm 4.5 dB)
Dimensions	H 47 " x W 12 " x D 14.5 " H 1200mm x W 305mm x D 370mm
Weight	65 lbs (30 kg)
Finish Options	Natural Bamboo

G7 Foxtrot

Musical Range	C1 (32.7Hz) to Max
Sensitivity	88 dB 1 watt 1 meter
Input Impedance	4 ohms (nominal)
Tweeters	Two Genesis R3T (front & rear)
Mid-Woofers	One Genesis 5.5" titanium cone
Woofers	Two Genesis 8" Isobaric Loaded
Tweeter Controls	Soft/Bright (\pm 4.5 dB)
Dimensions	H 53 " x W 14 " x D 16 " H 1350mm x W 356mm x D 410mm
Weight	86 lbs (39 kg)
Finish Options	Natural Bamboo

G7 Samba

Musical Range	A0 (27.5Hz) to Max
Sensitivity	88 dB 1 watt 1 meter
Input Impedance	4 ohms (nominal)
Tweeters	Two Genesis R3T (front & rear)
Mid-Woofers	One Genesis 5.5" titanium cone
Woofers	One Genesis 8" Servo-Active
Tweeter Controls	Soft/Bright (\pm 4.5 dB)
Bass Controls	Light/Rich (-3dB/+6dB)
Dimensions	H 53 " x W 14 " x D 16 " H 1350mm x W 356mm x D 410mm
Weight	102 lbs (39 kg)
Finish Options	Natural Bamboo
